A taste of what it's all about.....

Efficient business operations really make a difference to your business profitability. As we move slowly out of recession, this has become even more important. The 2010 FSDF Spring Conference is designed to deliver real practical advice and support to help you achieve your business objectives.

The conference agenda has been carefully designed to provide practical insights, operational guidance and information sharing, along with exploration of latest developments to help your business move forward and grow. The format is new and a response to the FSDF Autumn Conference 2009 feedback, to facilitate greater delegate participation and business relevance. Proceedings will start with a plenary keynote speaker, who will identify the current political and economic environment as we move close to a General election, and potential changes with a possible change of administration or even a hung Parliament. We will then split into three tracks to cover the different sectors of our businesses, which will address contemporary issues with the assistance of specialist speakers and case studies.
